* Caller ID and POP ID Features work only if you subscribe to the service provided by your local telephone company. There is usually a fee for this service. Caller ID Type 2 service is currently not available in New Zealand. # Diagram illustrates Concept Only. The actual enclosed product and its colour is shown on the front of the box. ∞ HD Sound is achieved by extending the audio frequency allowing the signal to be reproduced for improved voice clarity. ∅ Uniden's No. 1 status has been confirmed by 3rd party analysts in 2003 to 2012 using company sales data from all major cordless phone companies. † When a power failure occurs, the charged handset temporarily supplies power to the base unit. You can then make and receive calls using a handset. However, none of the keys on the base unit are functional during the power failure mode and the power life is limited to that of the remaining power life of the cordless handset battery. Photography and illustrations may differ slightly from actual product. The Bluetooth word mark and logos are registered trademarks owned by Bluetooth SIG, Inc. and any use of such marks by Uniden is under license. May contain additional foreign articles. XDECT™ and all brand names are registered trademarks of their respective owners. iPhone & USB cable not included in the box.
