Uniden Guardian Digital Wireless Surv...

Homeowners are becoming more security conscious than ever, with recent research revealing that one home is broken into every 90 seconds in Australia. Addressing the increasing demand for high quality, affordable security, the new Uniden Guardian is Australia's first true plug-and-play wireless surveillance system with a remote viewing iPhone or android app.

Uniden | **GUARDIAN**

Uniden Guardian Digital Wireless Surv...

Ideal for monitoring both the inside and outside of properties, the Uniden Guardian is the ultimate all-in-one security system for the home. The third of the series, the Uniden Guardian G2710 comprises of one weatherproof camera and a 7" tablet-style monitor with an intuitive touch screen interface. An optional wireless, portable indoor camera, which can be moved from room to room, is also available for those seeking extra surveillance inside the home.

Check out the Uniden Guardian in Action below

Uniden Guardian Wireless Video Surve...

Unique to Guardian is Uniden's innovative new iPhone and Android app, which allows people to check on their home remotely, be they at work, on holidays or simply out and about. There is an internet portal available that enables users to 'log-in' to the home monitor via their PC for access to the live video feed anywhere in the world. Unlike more complex internet-hosted IP surveillance systems, this easy-to-use app requires no complicated installation giving residents the opportunity to play 'big brother' in their own home - indoors and outdoors, and even take snapshots of what they see on their smartphone.

Offering wireless 'plug and play' functionality, Uniden Guardian is a true DIY security solution for the home. Set up is easy and can usually be completed in a matter of minutes. Guardian utilises the latest digitally encrypted FHSS technology to protect families against eavesdropping and hacking, while ensuring crystal clear, interference-free transmission of video and audio signals to a range of up to 150 metres between camera and monitor.

The Guardian G2710 allows you to monitor the safety of your children remotely. Featuring a Digitally Encrypted Signal, the Guardian G2710 is the ideal system for Secure Digital Crystal Clear monitoring and protects against eavesdropping and hacking for added security.

REMOTE VIEWING
Anywhere. Anytime.

Peace-of-mind is in the palm
of your hand no matter where you are.
+ OTHER GREAT FEATURES.

The Uniden Guardian system is capable of supporting up to four cameras, and users can customise recording settings to suit their individual needs, with scheduled, motion detection or manual record modes. In an industry first, the digital wireless system can record up to four cameras at once on the SD card so footage can be played back when required. Outdoor cameras can be easily mounted to a wall or ceiling, offering residents the flexibility to monitor activity where most required, such as at the front door, gate, garage or side of the house.

Add your account to Uniden Guardian at www.unidenvideo.com to give you the following Remote Features Including:

- View live video from your active cameras with a remote PC
- View live video on your iPhone or Android smart phone
- Realtime video recording to your remote PC
- Realtime snapshot capture to your remote PC, iPhone or Android smartphone

This Plug & Play DIY System consists of:

- 1 x 7" Tablet - up to 150 Metre Range from the Camera
- 1 x Weatherproof Camera

Now with an Industry First – Record all 4 cameras simultaneously on an SD Card (4GB SD Card included).
