

app cam Solo

Wire-Free Battery-Powered 1080p Weatherproof Smart Camera

with two-way audio, built-in PIR motion sensor, IP65 weatherproof, 1080p Full HD & night vision.

Two-Way Audio, Hear & Talk Back via Your Smartphones

Hear what's going on inside/outside your home and talk back just with a touch! With built-in microphone and speaker, you can communicate with your elders, kids, babysitters, pets, etc., wherever you are, making you feel your beloveds are always in your sight.

Long Battery Life, Up to 180 Days Standby Time

With advanced power-saving technology, Uniden Guardian App Cam Solo battery-powered security camera offers you up to 180 days standby time, no frequent battery replacement.

1080p Full HD & Night Vision

See everything in details with true 1080p Full HD. Get clearer and sharper images/videos than 720p cameras.

With exceptional 10 metre night vision, you can see clearly even in the dark. Day or night, indoors or outdoors, Uniden Guardian App Cam Solo won't stop protecting you. You can also check whether your baby is having a sweet dream at night on your mobile phones.

PIR Motion Sensor Instant & Accurate Alerts

130° wide-angle and highly sensitive PIR motion sensor offers almost no false alarms. No human movement can slip through without your notice. Receive instant app push notifications, email alerts and sound alarms when motion events are detected. Uniden Guardian App Cam Solo battery-operated security camera will be woken up at once when you access the camera for live streaming or when motion events are detected.

* IP65 Weatherproof is defined as no ingress of dust; complete protection against contact (dust tight) and Water projected in jets (6.3mm nozzle) against the enclosure of the camera from any direction shall have no harmful effects. Please note the security camera must be mounted under a Eave or Covered from the top to protect the wiring.

WiFi range (Distance) is all dependent from your routers capability which will affect your network coverage. If you need to extend your network coverage many third party range extenders are available which improve distance and eliminates black spots. Range Performance is affected by factors such as: full brick walls, tin roofs & large or multi-story houses.

[^] Based on full capacity 4 x CR123A battery with 1400mAh with one detection a day only.

Minimum Network Bandwidth Requirements: For optimal performance of the smartphone app we advise a minimum network bandwidth of 4Mbps for Full HD (1080P) live stream, 2Mbps for HD (720P) live stream and 0.8Mbps for 352P live stream. If these bandwidth requirements are not met the live stream may not connect and will not be viewable on your smartphone.

Motion Detection: Motion detection can be triggered by the monitor or PIR sensor. The PIR sensor only detects objects with heat up to 10 metres away and in the line of sight. At night, or in darkness, monitor motion detection sensitivity is not as effective as in daylight hours, as it relies on night vision capabilities.
